

Name of intervention:
Greater Depth Math's Group

Intent: This intervention is designed to provide further opportunities for children who are sitting on the EXS/GD standard to apply their learning to problem solving challenges. The small group environment of between 4 and 6 children gives learners opportunities to apply their learning and work together to solve complex problems.

Implementation: Small group session, once a week for 30 minutes.

Impact: Children are selected for the group at pupil progress reviews. Staff and SLT discuss children who are showing qualities of a greater depth learner. End of half term assessments determine the progress children are making against their greater depth targets.

Lead by: Pat Thompson
