

Name of intervention: **Talk Boost**

Intent: Early Talk Boost is a targeted programme aimed at 3–4-year-old children who need help with talking and understanding words. The programme helps to boost their language skills to narrow the gap between them and their peers.

Implementation: Children who are selected to take part in the programme will attend two sessions per week, each lasting 15-20 minutes delivered by one of our early year's practitioners. The sessions include activities that cover the foundation skills in speech, language and communication that children need for learning and understanding new words, as well as having conversations.

Impact: Children are assessed before they begin the Talk Boost Intervention and at the end of the intervention to see what progress they have made and if they need any additional support or intervention.
